### Ordering instructions

Take a copy of this and use it to custom configure your own media cabinet. The usable interior space for different height cabinets is marked. For the space requirements of components, see the component space requirement guide.

Start at the top and follow these simple steps:

1. Determine the components needed to accommodate your media.
2. Determine the interior height requirement for each component.
3. Total the number of inches required for all components.
4. Determine the necessary cabinet height. If you anticipate future growth, order a slightly larger cabinet.
5. Draw horizontal lines where you want each component installed.
6. Write the component number in the space above the drawn line.
7. Use any space left over at the bottom of the cabinet for miscellaneous storage.
8. Custom Configuration Template is required with purchase order.
